
NLS POSTER PROJECT

You will choose one first aid topic from the list below to create a poster with information about it. Use a standard piece of poster paper. You must include (at minimum) the following pieces of information:

History

- What events could lead a person into developing this condition?
- Can anyone develop this condition or is it caused by a medical problem.

Signs & Symptoms

- What signs and symptoms are characterized by this condition?

Treatment

- How would a LIFEGUARD go about treating this patient?
- What are additional treatments that you as a lifeguard might not have access to (hospital treatments, specialty equipment, etc.)

Also include interesting facts about the condition, stuff you didn't previously know about it, and some statistics if available.

Use a large title, colours, a large font and PICTURES!! Make your poster eye-catching so people are interested in reading it!!

Use your notes and the textbook in addition to other sources such as the internet, first aid textbooks, medical experts, etc.
